

JLG 600 SERIES

- Choice of models with up to a 20 m working height
- Fast boom and drive speeds improve work productivity
- Multiple simultaneous boom functions get you to the job quicker
- Proportional controls achieve smoother movement for operator comfort
- Excellent manoeuvrability for positioning of machine and platform
- Handle the roughest of terrain with increased engine power

For more details check the JLG Technical Specification Guide or ask your local JLG representative.

Oscillating axle option for tough travel

Provides increased traction when travelling.

Controls designed for ease of operation

Easier to operate when positioning and controlling movement.

Articulating Jib

Allows for greater versatility when positioning the platform around obstacles.
*Model 600AJ only.

Low mount platform access

Step-in entry height and high strength railings provide operator both convenience and security.

Narrow Chassis Option

A reduced chassis width of 2.1 m helps access into congested work areas.

Greater serviceability

Improved access with an engine swing-out tray.
