

## JLG 150HAX

- Largest self-propelled lift in the world at a working height of 47 m
- Longest outreach at 24.16 m of any self-propelled lift in the world
- Up and over height 24.38 m
- Fast boom and drive speeds improve work productivity
- Four wheel drive and four wheel steer is standard
- Proportional controls achieve smoother movement for operator comfort
- Excellent manoeuvrability for positioning of machine and platform

For more details check the JLG Technical Specification Guide or ask your local JLG representative.

### Proportional Drive Controls

Proportional controls provide operation for telescoping the main and tower boom and drive, lift and swing.

### 165° Powered Rotator

A sealed hydraulic platform rotator with 165 degrees of motion for improved positioning.

### Moveable Ground Control

The ground controls can be detached from the machine housing to aid the operator when loading the machine for transport.

### Ground to Platform Intercom System

An intercom system is supplied to permit communication between platform and ground personnel.

### Plate Steel Boom

Provides longer service life and minimal deflection for operator comfort.

### Extending Axles

Help to reduce stowed width for travel in confined areas and for ease of transport.
